**BIOMEDICAL EQUIPMENT SERVICE
WITH INTEGRITY**

 **20+ YEARS IN BUSINESS**

 **ONTARIO-WIDE SERVICE**

 **COLLEGE ACCREDITATION SUPPORT**

 **LICENSED & INSURED**

AT A GLANCE

The Short Version

WHO

Integrity Biomedical — an independent, Ontario-owned biomedical equipment service company with 20+ years in the field.

WHAT

Inspection, preventive maintenance, calibration, and repair of your clinic's diagnostic, monitoring, and procedure equipment.

WHEN

Scheduled maintenance visits, plus responsive on-call repair when equipment goes down.

WHERE

On-site, at your facility, anywhere in Ontario.

WHY

Because patient safety and referring-physician confidence both depend on equipment that performs consistently. Equipment maintenance expectations are set by the College of Physicians and Surgeons of Ontario (CPSO) and the Electrical Safety Authority (ESA).

THE CASE FOR US

Why Your Clinic Needs a Biomedical Service Provider

- ✓ **Patient Safety First** — A miscalibrated monitor or a stim unit that runs hot isn't just downtime — it's a liability risk. Regular inspection catches problems before a patient or referring physician does.
- ✓ **Documentation That Holds Up** — Maintenance and calibration records that stand behind you if CPSO, an insurer, or a referring employer ever asks for them.
- ✓ **One Provider, Every Brand** — We're not tied to a single manufacturer, so you get honest service across ultrasound, monitoring, and testing equipment alike — not a sales pitch.
- ✓ **Fewer Surprises, Longer Equipment Life** — Planned maintenance costs less than emergency repairs, and extends the life of equipment you've already paid for.

An independent biomedical provider is how you keep your clinic compliant, safe, and running — without adding it to your own to-do list.

COMPLIANCE, HANDLED

Built Around What Your Regulators Expect

College of Physicians and Surgeons of Ontario (CPSO)

Physician-run clinics are expected to maintain equipment used in patient care and procedures to a standard consistent with safe practice.

Electrical Safety Authority (ESA)

Equipment involving electrical current is checked to confirm it remains safe for patient use.

Health Canada Medical Devices Regulations

The equipment itself is federally regulated as a medical device — servicing it should meet the same bar.

We give you the paper trail before anyone asks for it.
