Keeping Your Practice Running Smooth

**BIOMEDICAL EQUIPMENT SERVICE
WITH INTEGRITY**

20+ YEARS IN BUSINESS

ONTARIO-WIDE SERVICE

COLLEGE ACCREDITATION SUPPORT

LICENSED & INSURED

AT A GLANCE

The Short Version

WHO

Integrity Biomedical — an independent, Ontario-owned biomedical equipment service company with 20+ years in the field.

WHAT

Inspection, preventive maintenance, calibration, and repair of your operatory and sterilization equipment.

WHEN

Scheduled maintenance, plus on-call repair when a chair or sterilizer goes down.

WHERE

On-site, at your facility, anywhere in Ontario.

WHY

Because one down operatory is lost chair time — and your **sterilizer and x-ray records are the first thing an inspection asks for.**

THE CASE FOR US

Why Your Clinic Needs a Biomedical Service Provider

- ✓ **A Down Operatory Is Lost Revenue** — A handpiece, compressor, or chair failure takes a treatment room out of service. Preventive maintenance keeps it in service.
- ✓ **Sterilizer Records Get Checked** — RCDSO's infection prevention and control standard expects documented spore testing and sterilizer maintenance — not a guess.
- ✓ **X-Ray Equipment Is Regulated, Too** — Your intraoral and panoramic units fall under the Healing Arts Radiation Protection Act. We help keep that file current.
- ✓ **One Provider, Every Brand** — Honest, manufacturer-neutral service across your whole practice, not just the equipment one rep sells.

An independent biomedical provider is how your practice stays compliant, your chairs stay full, and your equipment lasts longer.

COMPLIANCE, HANDLED

Built Around What Your Regulators Expect

RCDSO Standard of Practice — Infection Prevention and Control

Expects **documented sterilizer monitoring (spore testing) and maintenance records** for reprocessing equipment.

Healing Arts Radiation Protection Act (Reg. 543 — X-Ray Safety Code)

Dental x-ray equipment is registered and regulated — service and inspection records matter.

Health Canada Medical Devices Regulations

Your dental equipment is federally regulated as a medical device.

We give you the paper trail before anyone asks for it.
