# Reliable Equipment. Ready Procedures.

**BIOMEDICAL EQUIPMENT SERVICE  
WITH INTEGRITY**

**20+ YEARS IN BUSINESS**

**ONTARIO-WIDE SERVICE**

**COLLEGE ACCREDITATION SUPPORT**

**LICENSED & INSURED**

## AT A GLANCE

# The Short Version

## WHO

Integrity Biomedical — an independent, Ontario-owned biomedical equipment service company with 20+ years in the field.

## WHAT

Inspection, preventive maintenance, calibration, and repair of your reprocessing and procedure-room equipment.

## WHEN

Scheduled maintenance built around your procedure calendar, plus on-call repair when equipment goes down.

## WHERE

On-site, at your facility, anywhere in Ontario.

## WHY

Because a cancelled procedure list costs more than maintenance ever will — and your accreditation depends on the paperwork behind your equipment.

## THE CASE FOR US

# Why Your Clinic Needs a Biomedical Service Provider

- ✓ **Every Cancelled Procedure Has a Cost** — A reprocessor or light source going down mid-day means rescheduled patients and lost billing. Preventive maintenance is cheaper than a cancelled list.
- ✓ **Infection Control Depends on Working Equipment** — Reprocessing equipment that isn't maintained is an infection-control risk, not just an equipment problem.
- ✓ **Accreditation-Ready Records** — Documentation that supports your CPSO Out-of-Hospital Premises inspection — not assembled the week before.
- ✓ **One Provider, Every Brand** — Honest, manufacturer-neutral service across your whole equipment list.

**An independent biomedical provider is how your procedure days run on schedule — and your accreditation file stays ready.**

## COMPLIANCE, HANDLED

# Built Around What Your Regulators Expect

## CPSO Out-of-Hospital Premises Inspection Program (OHPIP)

Facilities performing procedures under sedation are expected to maintain equipment to a **documented standard under CPSO's OHPIP** — we build the file for you.

## Public Health Ontario / IPAC Best Practices

Reprocessing equipment (AERs, washers, sterilizers) needs to perform reliably to support your infection prevention and control protocols.

## Health Canada Medical Devices Regulations

Your procedure-room equipment is federally regulated — servicing it should meet the same bar.

*We give you the paper trail before anyone asks for it.*
