Keeping Your Clinic Moving

**BIOMEDICAL EQUIPMENT SERVICE
WITH INTEGRITY**

20+ YEARS IN BUSINESS

ONTARIO-WIDE SERVICE

COLLEGE ACCREDITATION SUPPORT

LICENSED & INSURED

AT A GLANCE

The Short Version

WHO

Integrity Biomedical — an independent, Ontario-owned biomedical equipment service company with 20+ years in the field.

WHAT

Inspection, preventive maintenance, calibration, and repair of your clinic's equipment to keep it working properly.

WHEN

Scheduled maintenance visits, plus responsive on-call repair when something goes down.

WHERE

On-site, at your facility, anywhere in Ontario.

WHY

Because patient safety and accreditation compliance both depend on equipment that actually works. Equipment maintenance and records are required by College of Physiotherapists of Ontario (CPO) and the College of Chiropractors of Ontario (CCO).

THE CASE FOR US

Why Your Clinic Needs a Biomedical Service Provider

- ✓ **Patient Safety First** — A malfunctioning ultrasound or stimulator unit isn't just downtime — it's a liability risk. Regular inspection catches problems before a patient does.
- ✓ **Documentation That Holds Up** — Maintenance and calibration records that stand behind you if the College of Physiotherapists of Ontario ever asks.
- ✓ **One Provider, Every Brand** — We're not tied to a single manufacturer, so you get honest service across your whole equipment list — not just a sales pitch.
- ✓ **Fewer Surprises, Longer Equipment Life** — Planned maintenance costs less than emergency repairs, and extends the life of equipment you've already paid for.

An independent biomedical provider is how you keep your clinic compliant, safe, and running — without adding it to your own to-do list.

COMPLIANCE, HANDLED

Built Around What Your Regulators Expect

College of Physiotherapists of Ontario (CPO)

The **Risk Management and Safety Standard mandated by the CPO** expects equipment to be maintained and calibrated per manufacturer guidelines, with maintenance records kept on file.

College of Chiropractors of Ontario (CCO)

The **Record Keeping standard of practice S-002 by CCO** expects every piece of equipment used to emit a form of energy be maintained as per manufacturer recommendations.

Electrical Safety Authority (ESA)

Equipment involving electrical current should be checked to confirm it remains safe for patient use.

Health Canada Medical Devices Regulations

The equipment itself is federally regulated as a medical device — servicing it should meet the same bar.

We give you the paper trail before anyone asks for it.
